PROJECTS

Controller Load Balancing & Failure Recovery in SDN | Python, Mininet, RYU Controller, Heuristics2025 – 2026

- Research-oriented project focused on optimizing controller resource allocation using Heuristic Algorithms to ensure high network availability and traffic distribution.
- Developed an automated Failure Recovery mechanism that monitors controller health and performs seamless failover to secondary controllers with minimal latency.
- Simulated complex network topologies in Mininet and evaluated algorithm performance against standard benchmarks in real-time traffic scenarios.

Anomaly Detection in Transactions | Python, scikit-learn, Isolation Forest

- Developed a Transaction Anomaly Detection System using Isolation Forest to identify fraudulent transactions based on patterns in transaction amounts and frequency.
- Implemented real-time anomaly scoring, confidence-level estimation, and interactive visualization using Pandas and Plotly for enhanced fraud prevention.

EXPERIENCE

Premade Innovations Pvt Ltd

June 2025 – Aug 2025

AI & ML intern

Remote
